¿Quién soy y por qué hago esto?

The screenshot shows the profile page for 'page-carbajal' on WordPress.org. The page includes a navigation bar with links like Showcase, Themes, Plugins, Mobile, Support, Get Involved, About, Blog, and Hosting. The profile section features a circular profile picture of a man wearing a hat, the username 'page-carbajal', and social handles '@iaaxpage on WordPress.org' and '@page on Slack'. There are links for 'Edit Profile', 'Edit Forum Profile', and 'Edit Notification Settings'. The 'Bio' section contains two paragraphs of text. To the right, a table lists profile details: Member Since (August 28th, 2010), Location (Cancun, México), Website (mxpage.org/wordpress-pro), Job Title (Marketing Manager), and Employer (Iconica Marketing). Below the bio is an 'Interests' section listing WordPress, WooCommerce, Magento, Prestashop, SEO, SEM, Marketing, and Sales. At the bottom, the 'Contribution History' section highlights three roles: Core Contributor (with a red icon), WordCamp Speaker (with a yellow icon), and Plugin Developer (with an orange icon).

Wordpress se escribe con 3 V

The screenshot shows a web browser window with the URL `varyingvagrants.org`. The page title is "Varying Vagrant Vagrants". On the left, there is a navigation menu with a search bar and a list of sections: 1. Introduction, 2. Getting Started, 3. Adding a New Site, 4. Site Templates, 5. Troubleshooting, 6. Reference, 7. Utilities, 8. TLS and HTTPS, 9. Slack, News & Changelog, Get Help on GitHub, and VVV on GitHub. The main content area displays the "1. Introduction" section, which includes the title "Varying Vagrant Vagrants", a paragraph describing it as an open source Vagrant configuration for WordPress development, a paragraph stating it's ideal for developing themes and plugins, and a list of objectives. Below the objectives, there are links to learn more about the project's history, governance, and how to contribute. The "Requirements" section follows, stating that VVV needs recent versions of Vagrant and VirtualBox.

1. Introduction

Varying Vagrant Vagrants

Varying Vagrant Vagrants is an open source [Vagrant](#) configuration focused on [WordPress](#) development.

VVV is ideal for developing themes and plugins as well as for [contributing to WordPress core](#).

Objectives

- Approachable development environment with a modern server configuration.
- Stable state of software and configuration in default provisioning.
- Excellent and clear documentation to aid in learning and scaffolding.

Read more about the [history of VVV](#), the [governance of the project](#), and [how you can contribute](#).

Requirements

VVV requires recent versions of both Vagrant and VirtualBox to be installed.

[Vagrant](#) is a “tool for building and distributing development environments”. It works with [virtualization](#) software such as [VirtualBox](#) to provide a virtual machine sandboxed from your local environment.
